

Live Power – Waratah to Sandgate New Infrastructure

SB Number – W2S-005

Date issued: 20th September 2021

New Live Power Changes on the W2S Project Site

Please be aware that as of the 19th September 2021, the USA/BT Feed location on south fork was relocated to the Up Side (of Up South Fork) and has incoming **LIVE** 120V power fed from the new Hanbury Junction Power Room 415V West Signalling Supply via a 415/120 Transformer at HJ28 Location.

NOTE: The 415 West Signalling mains cannot be isolated or turned off for any reason without possession of the Up South Fork and formal authorised permission from the following JMDR staff:

- Craig Doorey – JMDR Commissioning Manager

NO staff (other than listed above) are permitted to authorise the isolation of the 415V West Signalling Mains supply.

Kevin Ho
JMDR Project Director
